Education

National Institute of Technology Patna

Bachelor of Technology in Electrical Engineering (CGPA: 7.92 / 10)

2020 – 2024

Patna, Bihar

Experience

Tata Consultancy Services (Digitate)

Product Developer

May 2025 – Present

Pune, Maharashtra, India

- Designed and implemented an end-to-end workflow export system using dom-to-image and jsPDF, enabling 2000+ internal users to export complex visual workflows as PDF and image files, enhancing documentation and cross-team collaboration.
- Engineered an end-to-end Monaco Editor integration with custom code snippets and VS Code-style keyboard shortcuts, building the complete snippet and keybinding system to automate repetitive coding tasks and significantly reduce developer effort, improving development productivity by 30%.
- Architected and implemented an end-to-end real-time code compilation on our platform where code changes in the editor automatically trigger compilation after a 5-second debounced interval, leveraging Web Workers for background processing and RESTful APIs for secure server-side compilation, significantly reducing redundant compile requests, minimizing UI blocking, and improving overall developer productivity and system performance.
- Developed a block-level workflow editor with a visual flowchart interface enabling script configuration within each block, integrating dynamic forms and a script editor built using Angular Formly to provide a flexible and intuitive workflow scripting experience.

upGrad Education Private Limited

Full Stack Developer

July 2024 – May 2025

Okhla Phase III, New Delhi, India

- Implemented end-to-end CleverTap event instrumentation across critical user journeys, capturing 10K+ daily events to derive actionable learner behavior insights, enabling data-driven product decisions and significantly improving learner engagement and platform communication.
- Implemented a centralized API logging framework across all backend services and built an admin dashboard with filtering and pagination to analyze logs, significantly improving observability, accelerating debugging, and reducing issue resolution time by 30%.
- Developed REST APIs to generate real-time learner and academy reports, automating data retrieval and analytics workflows, significantly reducing manual data operations while ensuring accurate, up-to-date platform insights.
- Developed scalable full-stack features using the MEAN stack (MongoDB, Express.js, Angular, Node.js), architecting reusable UI components and robust backend services to support thousands of active users while improving development efficiency and maintainability.

Projects

Room Reservation System | HTML, CSS, JavaScript, Bootstrap

- Developed a responsive Room Reservation System using HTML, CSS, JavaScript, and Bootstrap, allowing users to easily search and view available rooms through an interactive UI.
- Implemented dynamic filtering functionality enabling users to find rooms based on their experience level and willingness, improving the efficiency of room discovery.
- Designed a user-friendly interface with Bootstrap components to ensure mobile responsiveness, better usability, and smooth navigation across different devices.

Technical Skills

Languages: C++, Java, JavaScript, TypeScript, SQL

Frontend: HTML, CSS, Bootstrap, React.js, Angular, jQuery, Angular Material

Backend: Node.js, Spring Boot, Express.js

Databases: MySQL, MongoDB

Tools: GitHub, Jira, CleverTap, GitLab, Postman, Chrome Developer Tools

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, System Design

Achievements

- Secured Global Rank 11 in CodeChef Starters 95 among 3,200+ participants, demonstrating strong competitive programming and algorithmic problem-solving skills.
- Achieved Global Rank 218 in LeetCode Biweekly Contest 116 among 21,000+ participants worldwide, showcasing advanced data structures and algorithms expertise.
- Consistently ranked within the top 800 in multiple LeetCode contests, competing against 20,000+ participants, reflecting strong analytical and coding abilities.
- Secured 3rd place among 3,600+ participants in a college-level problem-solving competition, demonstrating strong algorithmic thinking and competitive programming skills.

Coding Profile

Codeforces

Codeforces Specialist (Max Rating: 1477) with 250+ algorithmic problems solved.

Specialist
